

# If Global Warming becomes an issue, where would be the best places to grow bananas in the future?

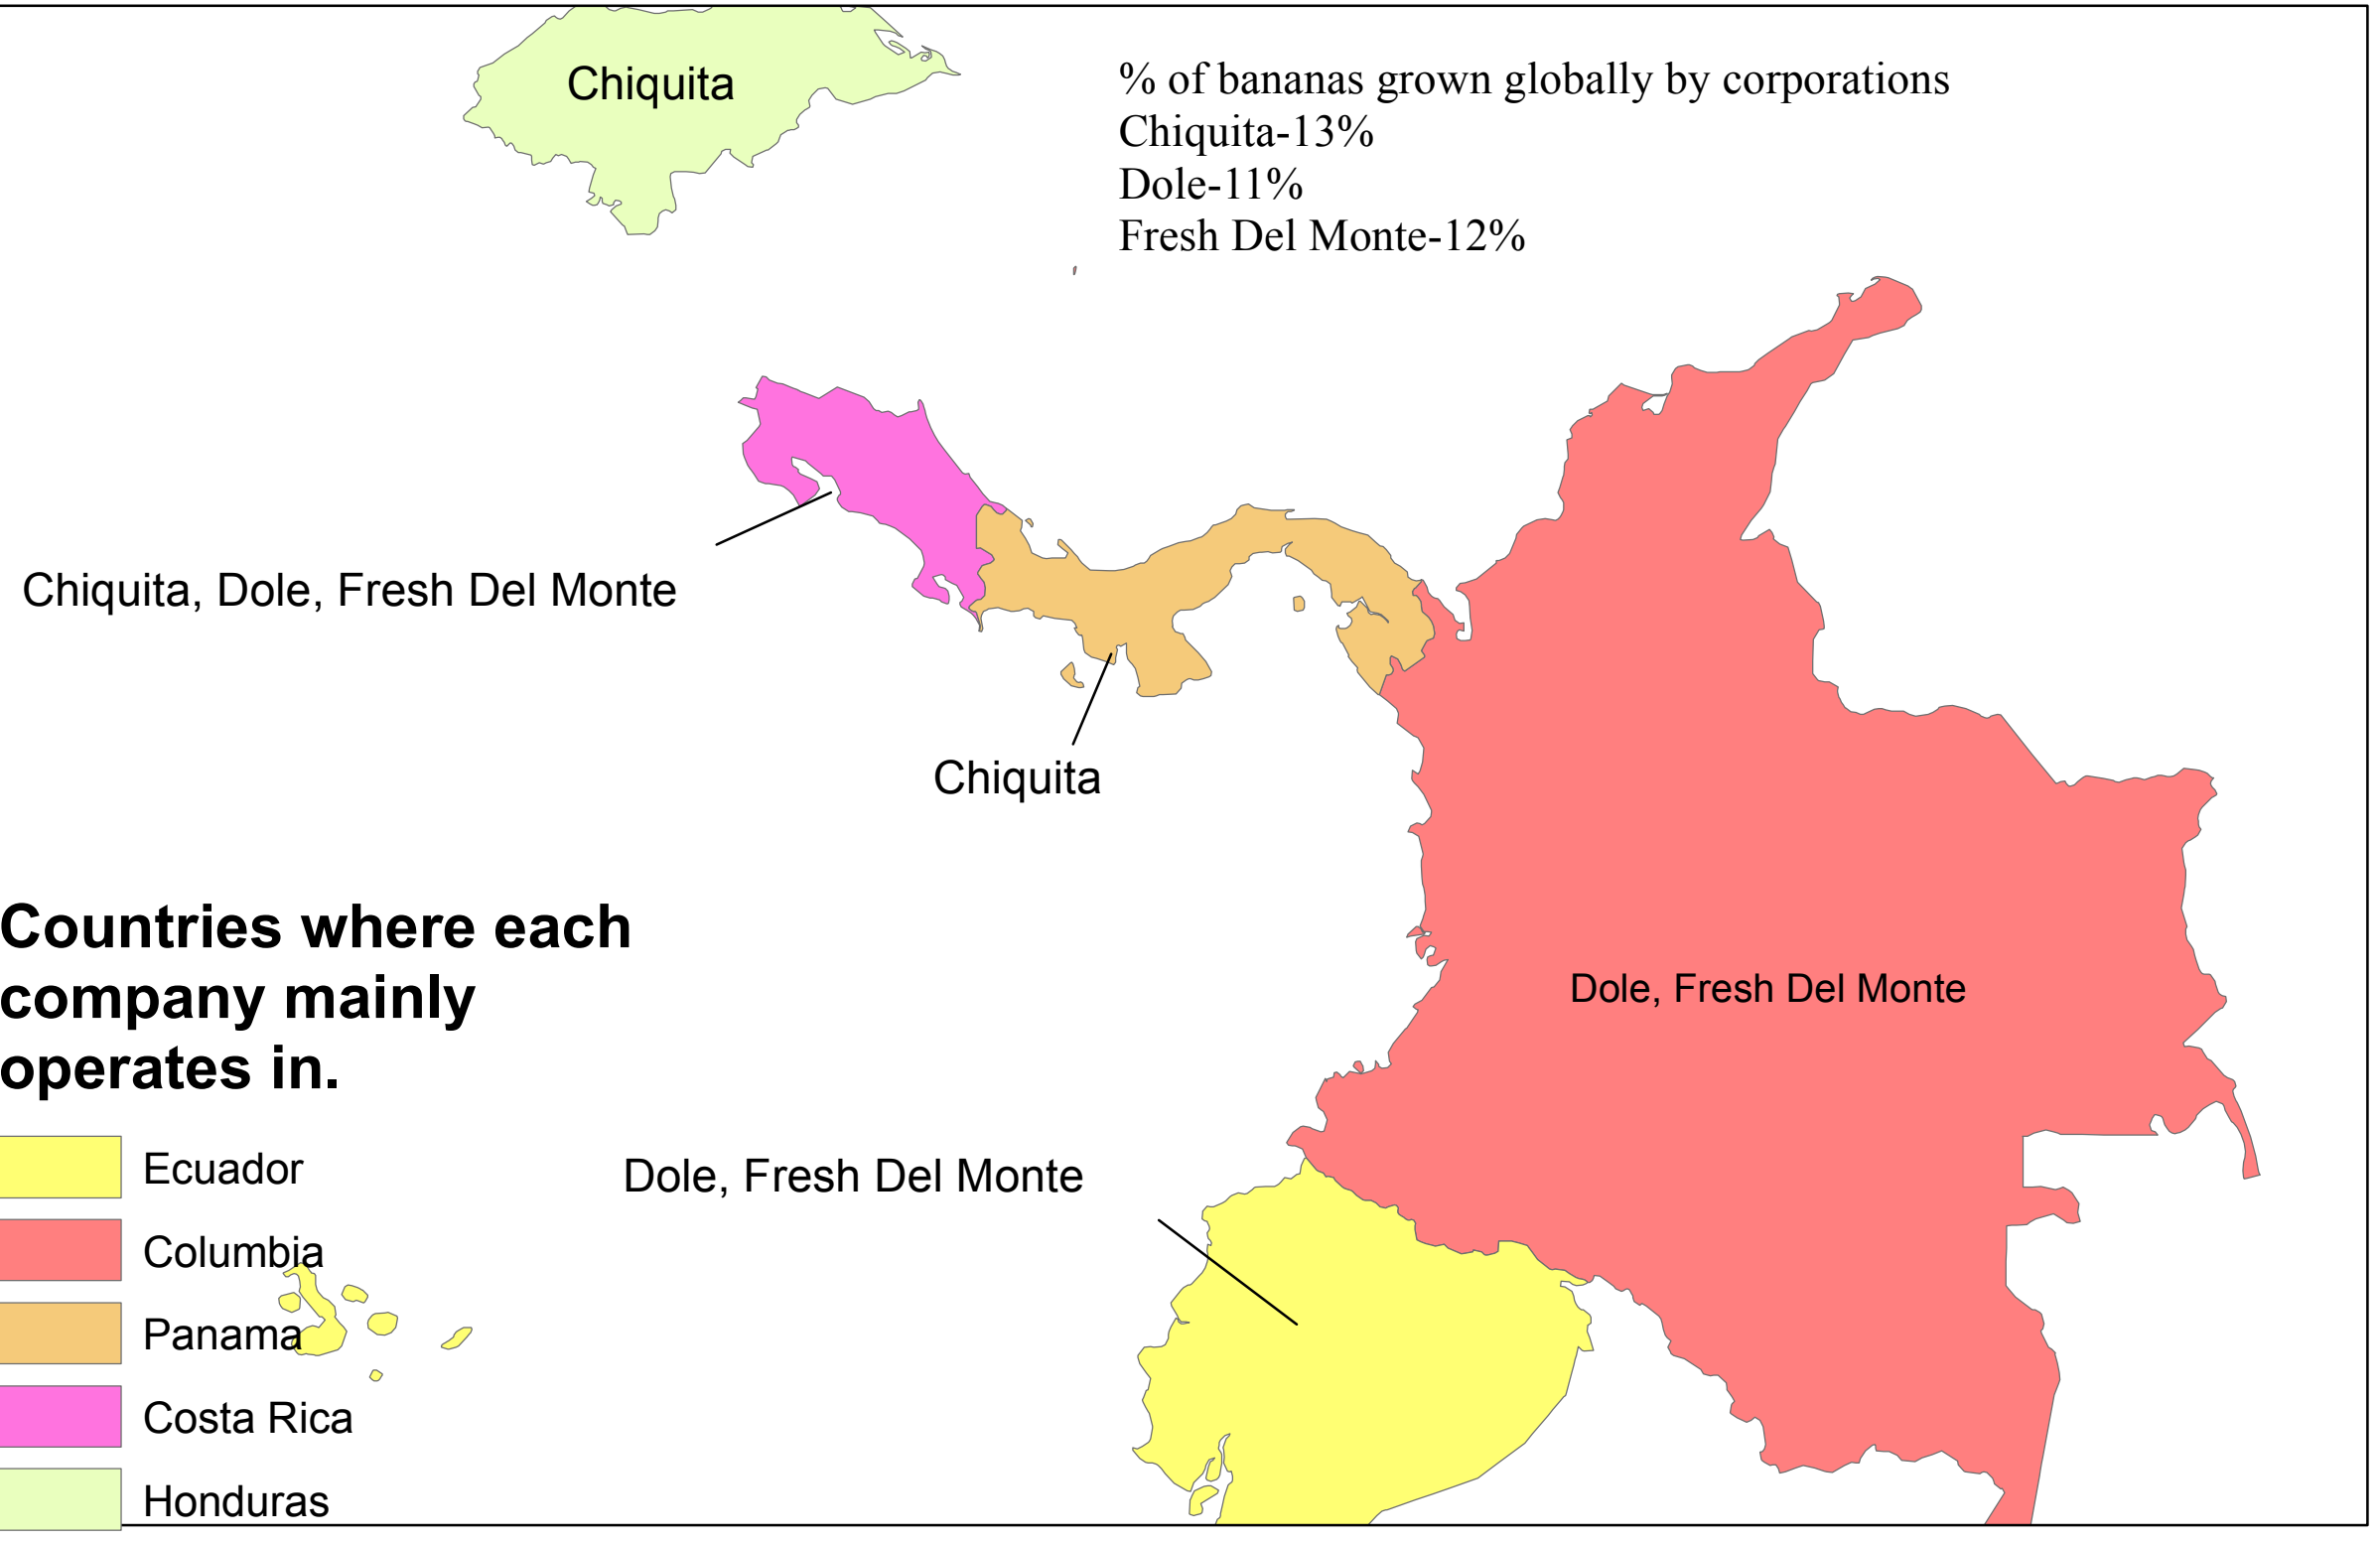

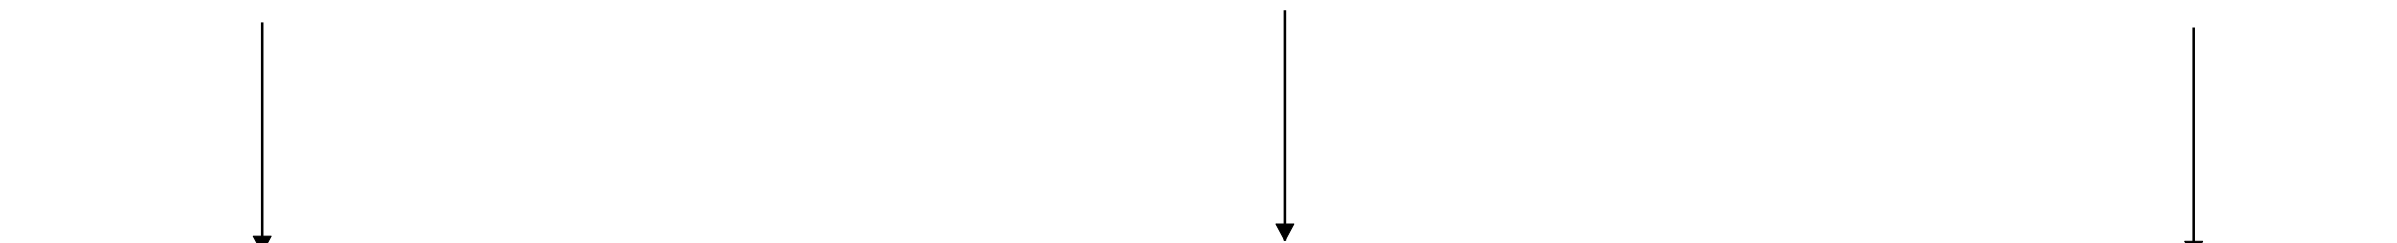

Top Exporters	2009 Value	Share
Ecuador	\$ 6,664,231,386	43.2%
Colombia	\$ 3,810,087,290	24.7%
Philippines	\$ 2,966,922,877	19.2%
Dominican Republic	\$ 556,580,349	3.6%
Belgium	\$ 530,612,494	3.4%
Germany	\$ 434,522,388	2.8%
France	\$ 282,827,176	1.8%
Netherlands	\$ 254,877,210	1.7%
Peru	\$ 243,978,050	1.6%
Italy	\$ 172,783,018	1.1%

## Countries with large corporate banana plantations

- Ecuador
- Columbia
- Panama
- Costa Rica
- Honduras

## Things I Learned From This Project

- Banana's are primarily grown in southern america
- Banana's are replaceable nutritonally, but are needed for many countries economy
- Explaining your maps thoroughly is important
- In the future, a good place for banana's to be grown would be in areas surrounding the Gulf of Mexico.
