

# MEASLES OUTBREAK 2019

## Measles Cases Per State

### New York

Counties with Measles

POPULATION2000=18,976,457  
 POPULATION2019= 20.106 Million.

The Measles outbreak of 2019, is looking to be the worst year in recent history. The previous high was in 2014 with 667 total cases. In 2019 within the first five months there has already been 880 confirmed cases in 24 states.

### Why?

Is it because of high population rates?

Or

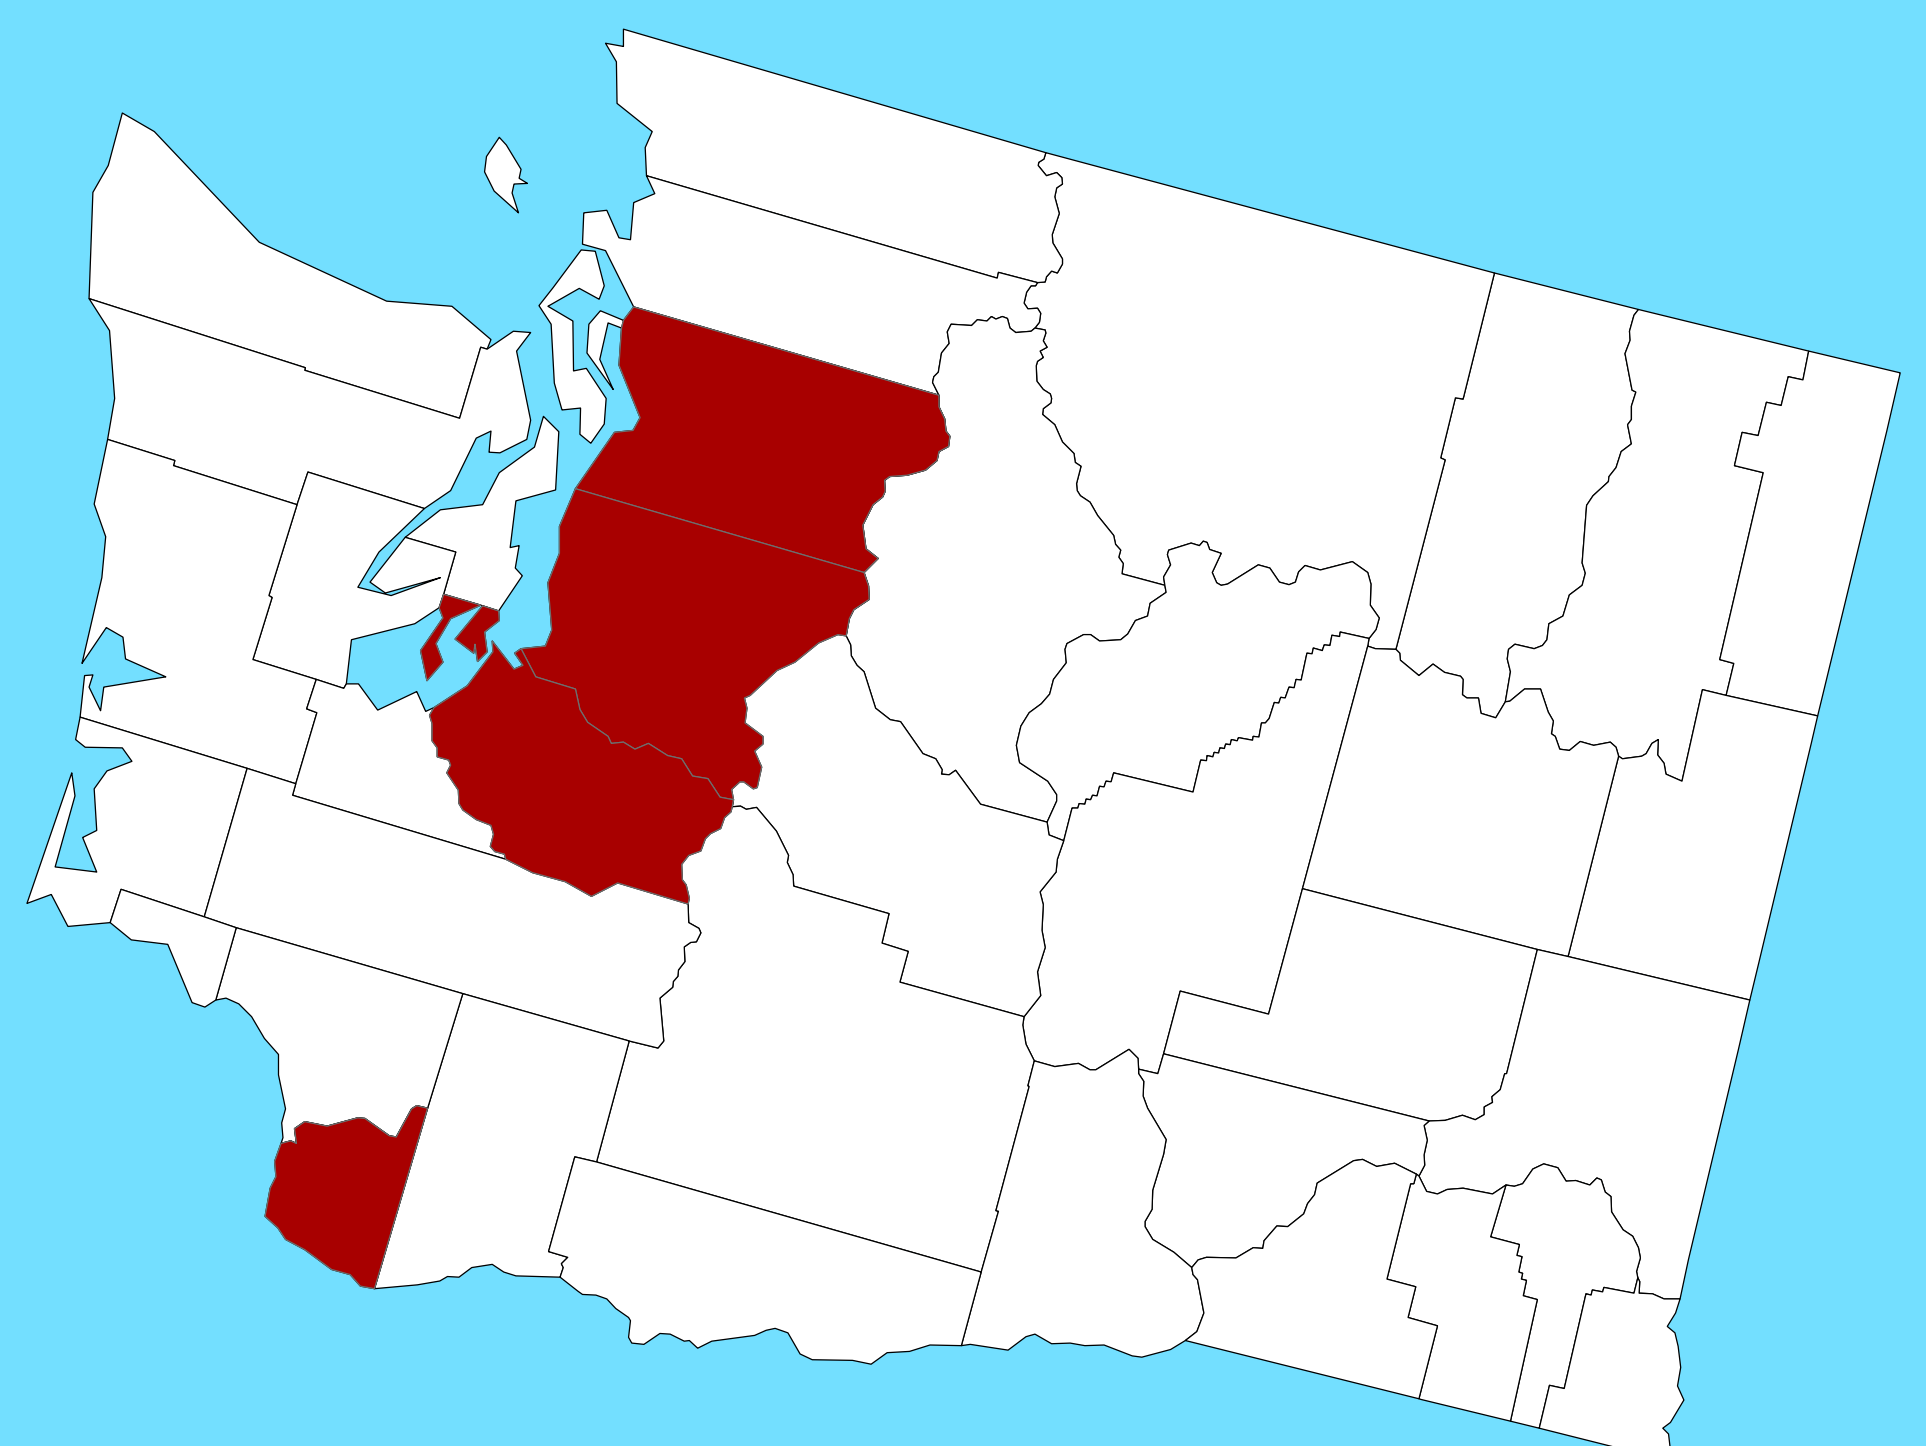

Is it because of Low vaccination rates?

Vaccination rates are lower than 95 percent in New York and Washinton which have the highest number of cases. Both States have increased their population by over a million people state wide since the 2000 census.

1 choose to do the 2000 census because this diease was declared eliminated that year.

### Washington

Counties with Measles

POPULATION2000= 6,724,540  
 POPULATION2019=7.5488 Million
